Body Dock® Pro SEX MACHINE

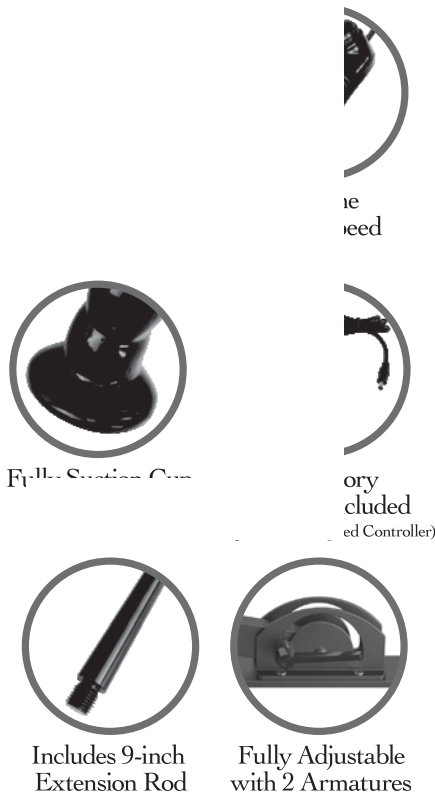

INSTRUCTIONS

Congratulations on purchasing The **Body Dock® Pro Sex Machine**, the ultimate sex partner designed for the enthusiast who demands the best! With its sleek and sturdy design, the **Body Dock Pro Sex Machine** provides a durable platform that boasts a steel frame with 4 powerful suction cup feet to stabilize motion during any sexual adventure! With an impressive thrust capability, you can adjust the thrust to virtually any angle, delivering powerful sensations that will rock your world! With its X-treme Multi-Speed controller, thrusting speeds can be customized to exactly how fast or slow you want it, whether you're craving super-slow gentle thrusts or intense, rapid pumps up to an incredible 200 thrusts per minute!

The **Body Dock Pro Sex Machine** works with most suction cup accessories on the market today, including some you may already own! The 3.5-inch docking plate features our patented Push & Play design, which allows you to easily attach or change your favorite suction cup accessory before you get down. Power up and control the speed of an additional accessory vibrator for extra indulgence! A 9-inch extension allows you to get into any position you desire! Standing, sitting, or laying down, the **Body Dock Pro Sex Machine** handles it all! For extra excitement, the **Body Dock Pro Sex Machine** can be detached from the base and hand-held by a partner!

It's time to push play, and thrust, with the incredible **Body Dock Pro Sex Machine**!

INCLUDES

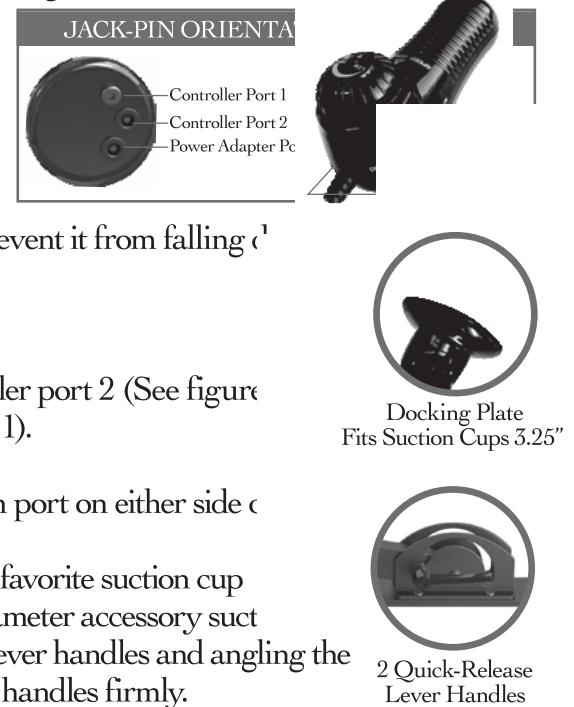

SETUP

Some assembly required.

1. Unpack and verify all parts are included (see list on flip-side).
2. Choose a surface to locate your unit. Suction cup feet will adhere to non-porous surfaces, but the self-standing unit can also be used on flat surfaces like a bed or couch without suction. (Do not mount onto vertical walls. Always position the unit to prevent it from falling off.)
3. Turn main unit over and insert 4 suction cup feet.
4. (Optional) Screw on 9-inch (22.9 cm) extension rod.
5. Screw Body Dock docking plate onto thrusting armature.
6. Plug remote controller jack-pins into controller port 1 and controller port 2 (See figure 1).
7. Plug power adapter jack-pin into power adapter port (See figure 1).
8. Plug power adapter into outlet.
9. (Optional) Plug 4-inch accessory vibrator (included) into jack-pin port on either side of multi-speed controller, left or right handed. (See figures 1 & 2).
10. Push-and-play! Attach the included 7.5-inch (19 cm) dildo or your favorite suction cup accessory to the docking plate. The plate fits 3.25-inch (8.2 cm) diameter accessory suction cups.
11. Adjust the armatures one at a time by loosening the quick release lever handles and angling the arms to your intended position, then tighten the quick release lever handles firmly.

Fig. 1

USAGE

Apply an adequate amount of lubricant to your accessory and position yourself to receive the thrusting motion. Using the X-treme Multi-Speed Controller, turn on the Body Dock Pro Sex Machine on LOW (it will make a clicking sound) and the thrusting motion will begin on low speed. The machine has a thrusting distance of 2.6 inches (6.6 cm). To increase speed, gradually turn the main dial clockwise to increase thrusting motion (see Figure 2). The unit is capable of 200 thrusts per minute! To stop the unit from thrusting, turn the dial all the way counterclockwise to the off position (the dial will click).

To use the accessory vibrator, plug it into the control unit and spin the dials on the side of the remote control unit on the side that you plugged the accessory into (left or right). To increase vibration speed, scroll up towards "high".

CLEANUP

When finished using the **Body Dock Pro Sex Machine**, clean dildo and any accessories with antibacterial cleaner and warm water. Wipe all other parts with a clean dry cloth before storage.

CAUTION

Always use discretion when starting up the thrusting motion. Start with a slow pace and gradually increase speed to your comfort level. Never crank up the speed immediately. Never use this device near water. Use lubricant on accessories. Do not put this electrical appliance within five feet of a bathtub, sink, or swimming pool.
